7 Steps To Passive Income

You are most likely reading this because you are really interested in how to create a passive income lifestyle for yourself. A lifestyle that doesn't depend 100% on your active efforts for the money to keep rolling in.

I can't blame you! This is the same thing I was looking for several years ago when I stumbled upon making money online. The journey wasn't an easy one but every experience was a learning experience, and I learned exactly how to leverage my time and money to work for me.

There are several ways to attain passive and semi-passive income streams. The key to making passive income work is to focus your efforts on one thing until it is able to run on it's own. Then add another, and another. If you try to focus on too many streams at once it will cause frustration.

The goal of this blueprint is to provide you with a guide to putting together your passive income plan as well as avoid frustration in the process.

Let's dive in!

Step #1- Analyze The Options

There are many different ways to make passive income. Not all of them are feasible for everyone. Let's look at a few ways:

[Start A Shopify/Ecommerce Store](#)

[Release an ebook](#)

[Make an online course](#)

Start a digital ad agency

Get into a digital ad agency

[Start a Membership site](#)

Sell document templates

Sell WordPress themes

Sell graphics packages Sell stock photos

Sell music loops

[Sell CBD oil online](#)

Sell essential oils online

Sell business kits

Sell legal documents

Sell architecture plans

And since I'm guessing most of you aren't lawyers or architects, this next one's for you :)

Partner with someone who can create something you can't!

[Monetize a blog](#) or a [Facebook Fan Page](#)

[Start a Facebook Group](#)

[Create turnkey niche websites](#)

Invest in Gold or Silver

Invest in Bitcoin/Mine Bitcoin Forex Trading

Invest in a Lending Club or Microlending sites

Get paid for things you do anyways (cash back rewards, rebates)

Step #1- Analyze The Options – continued

Invest in a new/existing business as a silent partner (think shark tank)

Get a licensing deal

Buy an existing ecommerce site

Rent out tools

Rent out party/event equipment (tents, photo booths, bouncy houses, tables & chairs)

Buy rental properties

Rent out vacation houses/Air Bnb' s

Rent out your basement

Vending/Candy/Game machines

Step #2- Determine Your Goals

What are your personal goals? How soon do you want to retire from your active income source, if at all? Often this is directly correlated with how much time or money you are able to commit.

Let's say you had time and energy but no capital then something like blogging or video blogging would be more down your alley. Here is more on that:

[Affiliate Marketing](#). What is it?

This is where you start a blog or video blog and you share your content about a specific subject in the marketplace(also known as a "Niche"). Shortly, you're the bridge between People looking for something you have to offer them whether it be a product/service and the retailer like Amazon. It's all detailed specifically inside my [How to make a passive income with affiliate marketing video](#).

Furthermore, If you don 't have the capital to invest in a rental property, maybe investing in game or vending machines is more up your alley.

Many people believe that they can take any “Online Business Model” and turn it into a passive income stream, but is that REALLY true?

No. Sure, there might be hundreds of ways to make money online, but are they passive?

Across the web, and in your online journey, you’ll constantly hear things like:

- Ecommerce
- Dropshipping
- Shopify
- Digital Agencies
- Market trading
- Surveys

Among many others. And to be honest, you can make money from them, but they ARE NOT passive. You constantly have to be updating, brining in more people to earn a high profit, or distribute more products to be profitable, and they just can take up too much effort for very little to nothing at times.

I even made a video that shows you exactly what I mean when it comes to [starting a business online and making it passively.](#)

So if this “Affiliate Marketing” model is the key to unlocking your financial and time freedom, where do you start?

Look, I’ve been doing this for awhile(started in 2017) and I’ve done it and seen it all already, so let me reveal to you two ways.

1. Create Niche Amazon Websites
2. Create a Recurring Digital Information stream

With option 1, you have the chance to either [create a blog](#) and or Even a [Video Blog](#).

Basically, all you're doing is producing content around a specific passion, interest, or hobby of yours and turning it into a passive income. For example:

In one of my businesses that I first ever started, I created a Lower back Pain blog site...

I wrote content to my audience, did YouTube Videos and I began to see profits come in. All from just selecting amazon products and reviewing them.

Now, the world is your oyster, meaning that you're not just limited to Amazon products, but any others really. There are millions of retailers that you can promote products for, and earn your commissions.

Option 2: Digital Streams

My favorite passive income streams for beginners are digital streams because they are much lower cost. For instance, it's much cheaper to build a small website for digital assets like templates and legal documents than it is to buy 2 candy machines. It will require more set up time, though. Check this out...

Amazon Niche websites are great, and I encourage everyone to start here, but they are not recurring. You still have to sell many items to make \$2,000, \$4,000 + or however much you are shooting for. While it's VERY possible, many people also want something more secure, and that's where the recurring digital information part comes into play.

Rather than making an amazon niche website, you can partner up with companies that have:

- Books
- PDF's
- Guides
- Training
- And then some

You can take what they already have (without owning your own product) and promote them. This is something I teach in [my #1 Digital Information Affiliate Program](#)

Why not do both?

This might sound a bit advanced, but you can DEFINETELY combine an Amazon Niche website with A digital information one. This is what I do everyday, combining my amazon niche site with the recurring model.

I've worked with people who start in either one, and then venture into the other, so it's totally Ok if you start with one vs the other. You should have taken the Pre-Qualification Quiz to determine that, but if you haven't, check out [my passive income quiz](#).

Passive income is great; but it isn't recession proof. Your goal should be to expand into several different income streams. The concept of never putting all your eggs in one basket still applies with passive income streams.

A simple google search analysis of your local market (if necessary) should provide enough insight on average monthly income you can expect from any of these ideas. Of course it will just be an estimate as factors like location, your marketing efforts, and the local economy play their part.

Step #3- Put Together A Plan

Now it's time to put together a personalized plan. You've seen the different passive income options and know which ones are viable possibilities for you and

which ones aren't. Considering the time and money you have to work with and your personal goals, you'll need to craft your plan accordingly.

As I stated in the last section, **I have a heavy preference for digital income streams** because they're fairly easy to get started and easy to keep running. I think the best place for most people to get started in their passive income journey is having a digital asset.

A few of you may be looking at this list and saying, "Sounds great in theory, but I can't design turnkey websites, create legal documents, make templates, take stock photos...or ANY of that!" Don't panic!

A savvy business man/business woman knows the lack of a skill isn't the end of the road for them. They know how to leverage and exploit resources to get what they want. Who do you know that has a ton of knowledge in a specific niche? Who do you know that can teach others how to do something? Who do you know that is a Microsoft genius? Who do you know that has a ton of great photographs that are usable? Any skill can translate to an online course, video series, audio series or ebook.

If you don't know anyone who has these skills- don't sweat it! There are people you can hire to create whatever you want.

I give a full list of my secret arsenal of places I go to hire people to do things I can't do, in my ["Online Affiliate Marketing Free Course"](#)

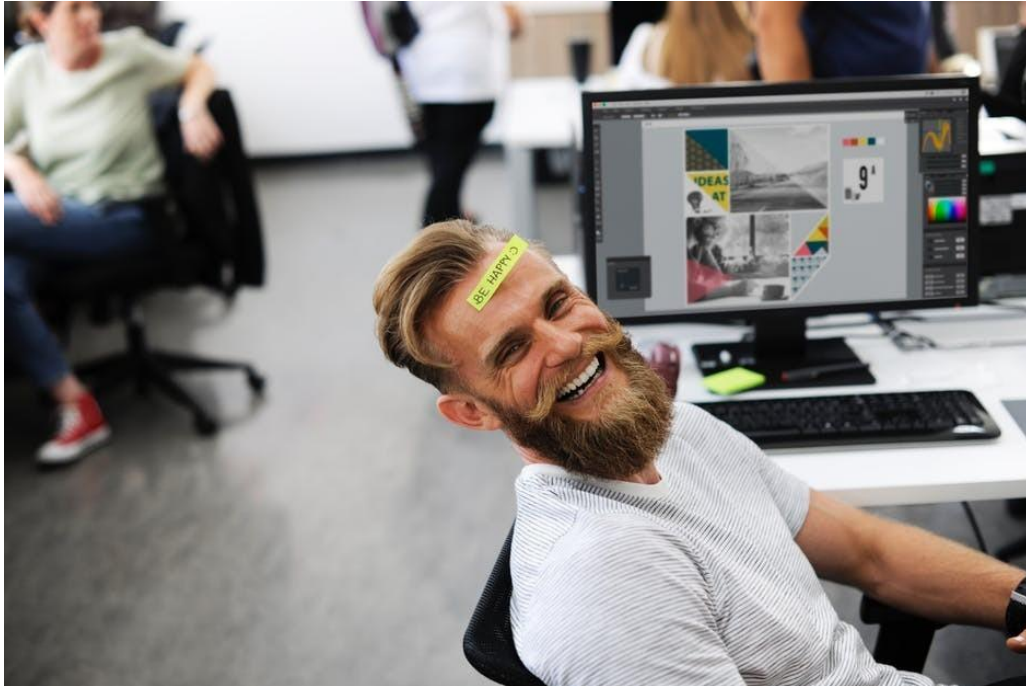

Step #4- Execute

Now it's time to execute your plan. Without execution of what you have learned thus far, your dreams of making passive income may slip away.

The most important thing to keep in mind is that plans- rarely if ever go 'as planned'. Staying committed to your goals and remaining flexible with your plan is an important part of the execution process.

This is where most people will fail in their journey. We have all felt discouraged. It's what you do with adversity and discouragement that really determines the outcome!

One of the best things I can recommend is to do a little bit every day. **Consistency is more important in the long run than perfection.**

One of my favorites ways to make a passive income online is through the Affiliate Marketing Business Model, and I've made as much as \$2,000 in a single week! I'm DEAD Serious. With the right mindset, work ethics and drive you can get there too. And I have every intention and bone in my body to make sure you can succeed.

Even though there is no barrier to entry to start, it may not be for everyone. That's why I've made for you a video that tells you the [3 best signs that affiliate marketing may not be right for you though.](#)

So you can never do it then? Not exactly. Like you I had the same thoughts that this affiliate marketing thing was going to be a walk in the park, I'd put up a website, drive people to it and BAM, Cash Money!

It drove me nuts, I spent countless days and hours focusing on the wrong things, and if I had not, I would have seen accomplishments coming in like a wave. Here's more of that story from my beginnings to where I am today: [Click here to watch my transformation and my #1 secret to becoming a wealthy affiliate.](#)

Step #5- Automatic Profits

One of my favorite ways to create passive income literally out of "thin air " is to automate the sales process. I cover this greatly in coaching sessions with my clients and touch on it just a bit in my [Free Facebook Mastermind Group](#)

The idea here is to simply put your passion to work by leveraging the internet. It doesn't matter if you are a relationship expert, a car fanatic, a health nut, or a marketing expert. People are always looking to buy information that will simplify their lives.

Once you figure out what you are passionate about, make it an everyday effort to develop a brand around how you can serve the masses with your gifts and talents.

The easiest and simplest way to leverage and brand yourself is by creating a sales funnel process that showcases your product, service, and expertise all in one.

After the puzzle pieces are all put together, this idea of "making money in your sleep" will soon become a reality. A strong brand with a consistent message and marketing efforts will bring in sales day and night. Waking up to automatic profits is a wonderful feeling and I believe you can create this for yourself if you tap into what you are passionate about.

Step #6 - Piggy Back Method

One of the ways I make more than half of my income online is with the "piggy back method." This strategy involves leveraging the expertise of another entrepreneur in order to make passive income online.

For example, if your passion is health and wellness and you have yet to find a product or service to offer to the public, you can simply copy and paste your way to making a nice income online without any prior experience! I go into more detail on the logistics of this technique and how to become very profitable with this strategy in the full copy of "[Passive Income Ebook](#)".

The great thing about this method is your out of pocket expense is very little to nothing if you play your cards right. There are thousands upon thousands of experts out there who are willing to give you a piece of their real estate online if you qualify. And if and when you do qualify, the potential commissions you can make could very well replace your full time job in due time.

Step 7- Get Paid to Speak

The last and final step is getting paid to speak. Yes-- you!! I know what you 're thinking, and no you don 't have to be some fancy guru. There is a way to get paid to speak about what you are passionate about.

Sure you can book regular speaking engagements locally and nationwide. I know plenty of entrepreneurs that speak on a regular basis. However, videos are another way you can get paid to speak. How? YouTube has a partner program that pays it' s members for views of their videos in exchange for running a short ad.

If you are consistent with your message, your profits will continue to increase. There are various other platforms online where you can have your voice heard by the masses and get paid for it. The secret of all these passive income ideas is to know your passion well enough to give value to the masses.

Everyday in my business I have found various ways to generate a daily passive income. It' s truly a blessing to be able to earn passive income while sleeping, working out, walking the dog, while on vacation, or just enjoying family time. My passion is simply to show people the simplest ways to make a full time passive income online with little to no effort once you tap into the most sought after secrets. Are you ready to change your financial situation today? [Pick Up My Full Affiliate Marketing Free Course Here.](#) You won 't be disappointed.

Your Next Steps
